AB - JP2000094601 NOVELTY - Decorative sheet has a foam layer (3) consisting of olefin type thermoplastic resin containing a foaming agent, a flame retardant and a pigment, formed on a base layer (2). A coating resin layer (4) consisting of an ionomer resin is provided at the top.

- USE - For internal equipment of buildings such as wall paper stuck on wall ceilings.
- ADVANTAGE - As the layers are of non-chlorine group present, an environment friendly decorative sheet is obtained. Wet friction of the sheet is improved by providing coating resin layer consists of ionomer resin on foam resin layer, and damage due to tearing of the sheet is avoided. The layers are manufactured by coextrusion process, thus high productivity with low manufacturing cost is attained.
- DESCRIPTION OF DRAWING(S) - The figure shows sectional view of decorative sheet.
  - Base layer 2
  - Foam layer 3
  - Resin layer 4
